

Global Health Clinical Scholars 2022 Scholarly Projects

Participants in the Global Health Clinical Scholars Program are expected to identify and complete a scholarly project as part of their program requirements. The scholarly project provides trainees with the ability to explore a global health topic in-depth, via a mentoring experience. Trainees then present their projects at Northwestern's annual Global Health Education Day, held each spring. Examples of Scholarly Projects completed in 2022 can be found below.

Name	Program	Title of Scholarly Project	Type of Project
Yu, Karina	ENT	The Surgical, Educational, and Sustainability Outcomes of Short Term Surgical Trips in Otolaryngology- Head and Neck Surgery: A Systematic Review	Original Research
Rajagopal, Aarabhi	Pediatrics	Patient Family Experience of Limited English Proficiency and Immigrant Families at Lurie Children's Hospital	Original Research (Qualitative)
Chan, Elizabeth	Peds PM&R	The Impact of Virtual Programming in Expanding Boundaries	Original Research
Underberg, Daniel	Internal Medicine	Polypills for the Prevention of Cardiovascular Disease	Literature Review
Mormann, Meaghan	Pediatrics	Resident Linguistic Diversity and Its Impact on the Provision of Language-Concordant Care	Original Research
Anis, Bushra	Family Medicine	A Literature Review Examining the Perinatal Mental Health of a South Asian Diaspora Population	Literature Review
